**To:** Brent Turner [REDACTED]

Dear Mr. Turner,

Thank you for your request for access to Louisiana's election system. As I'm sure you understand, and have heard from other states, this is a particularly sensitive request given the high anxiety surrounding voting machine security. Additionally, under our current voting machine contract with Dominion, we are prohibited from sharing our software system with you.

While we are not able to participate, I do wish you luck with your research across the nation.

Sincerely,

Tom Schedler

Louisiana Secretary of State

**Subject:** Request for access to election systems

Dear Secretary of State:

Our team of computer scientists are interested in accomplishing a forensic analysis of the voting systems utilized in your state for the 2016 Presidential election.

Alternatively, if any analysis has been accomplished we would appreciate access to those studies for peer review.

Please apprise how we might move forward to accomplish this work for the benefit of our democracy.

We have notable expertise and will provide credentials upon request.

Best regards,

Brian Fox / Brent Turner
